

What is the best solar protection fluid?

The most popular solar protector in the range is the Fernox Solar Protector, a solar fluid compatible with all makes and models of solar panels. When solar safety valves actuate, the solar glycol fluid that gets expelled must be stored in a secure container.

What is a solar thermal system fluid?

With great prices, fast shipping and free returns, shopping with us couldn't be easier. A solar thermal system fluid transfers heat from the collector to the storage tank, prevents corrosion and scale formation and helps the heating system resist freezing while maintaining stable thermal properties over a wide range of temperatures.

Which solar heat transfer fluid should I use?

Our solar heat transfer fluids are designed for use with hot plate and vacuum tube solar heating systems. The most popular thermal fluids in the range are the Sentinel R100 Solar Thermal Fluid, a stable, non-toxic glycol fluid and the Cura Solar Heat Transfer Fluid, a ready to use fluid that offers frost protection to -28°C.

Does BES offer solar thermal system fluid?

At BES, we understand the importance of having the right solar thermal system fluid, which is why we offer high-quality system fluids that meet the highest industry standards. Whether you need thermal fluid, solar cleaner, solar fluid or demineralised water, get a good deal on solar thermal system fluid when shopping at BES.

What is a safe valve solar fluid recovery container?

When solar safety valves actuate, the solar glycol fluid that gets expelled must be stored in a secure container. Our most popular recovery container is the Safe Valve Solar Fluid Recovery Container, which includes a drain valve. You can also view our entire range of renewable heating & ventilation products here.
