

What are lithium stocks?

Lithium stocks are commodity stocks that have principal interests in the mining, refining and distribution of lithium. The companies included under the umbrella of lithium stocks may be involved in the production of other metals and minerals, but lithium will be included in their portfolio.

What are the best lithium stocks?

One of the younger firms on this list of best lithium stocks, Pilbara was incorporated in 2005 and primarily produces lithium through a wholly-owned project located in a region of Western Australia. That site is billed as the largest independent hard-rock lithium operation in the world, and Pilbara has estimated the mine life at 34 years of output.

Are lithium stocks a risky investment?

Finance, as of May 30, 2024. Lithium stocks, like all commodity stocks, are closely linked to the supply and demand trends in the underlying materials they produce. All investing generally carries risk, and miners like this have specific risks based on their business model. That said, we've tried to highlight leaders in the sector based on:

Are Lithium prices finally bottoming out?

Lithium prices may finally be bottoming out. Here's what that means for sector stocks and ETFs. Lithium, a key component in battery manufacturing, should benefit from increased demand for EVs in the fourth quarter of 2024. September's EV global unit sales number rose to 1.7 million, a new high.

Will Lithium prices go up again if EVs increase in demand?

If EVs continue to increase in demand, though, the price of lithium--as well as the prices of stocks for the companies that mine, refine and distribute lithium--could go up again. Investing in lithium stocks is the same as investing in any other kind of stock.

Where can I buy Lithium Americas (Lithium Americas) stock?

Lithium Americas stock is traded on both the NYSE and the Toronto Stock Exchange (TSE). The stock also currently qualifies for Benzinga's stocks under \$20 category.
