

The latest battery direct purchase price list

Who is battery-direct?

battery-direct is a producer of battery systems for emergency power systems and a specialist dealer for industrial batteries. We have been offering rechargeable batteries and systems for uninterrupted power supply for over 18 years and are a reliable partner in protecting against data and device damage. All prices listed are excluding VAT.

How much does a battery electric vehicle cost in 2023?

For battery electric vehicle (BEV) packs, prices were \$128/kWh on a volume-weighted average basis in 2023. At the cell level, average prices for BEVs were just \$89/kWh. This indicates that on average, cells account for 78% of the total pack price. Over the last four years, the cell-to-pack cost ratio has risen from the traditional 70:30 split.

How much does a battery cost in 2023?

The figures represent an average across multiple battery end-uses, including different types of electric vehicles, buses and stationary storage projects. For battery electric vehicle (BEV) packs, prices were \$128/kWh on a volume-weighted average basis in 2023. At the cell level, average prices for BEVs were just \$89/kWh.

Do battery prices follow raw material prices?

Evelina Stoikou, energy storage senior associate at BNEF and lead author of the report, said: "It is another year where battery prices closely followed raw material prices. In the many years that we've been doing this survey, falling prices have been driven by scale learnings and technological innovation, but that dynamic has changed.

What happened to EV battery prices in 2022?

After dropping 14%, they are down to \$139/kWh. The steep price drop and record low average price come on the heels of price increases in 2022 that had brought battery prices back to 2020 levels. The world changes fast. Just looking at EV lithium-ion batteries, the average price for packs was down to \$128/kWh, and for cells it was down to \$89/kWh.

How will Lithium prices affect EV battery prices in 2023?

Effect on Battery Prices: The decrease in lithium prices is expected to further lower the prices of lithium-ion batteries, continuing the trend observed in 2023. In June 2024, the average prices for EV battery cells saw a decrease: Square Ternary Cells: Priced at CNY 0.49 per Wh, down 2.2% from May.

IEA analysis based on material price data by S& P (2023), 2022 Lithium-Ion Battery Price Survey by BNEF (2022) and Battery Costs Drop as Lithium Prices in China Fall by BNEF (2023). Data until March 2023.

The latest battery direct purchase price list

Lithium-ion battery prices (including the pack and cell) represent the global volume-weighted average across all sectors.

If your bank does hold you liable for a portion of this \$50.00, Batteries Direct will cover that cost for you, up to a maximum liability of \$50.00. Batteries Direct will cover this liability only if the unauthorized use of your credit card resulted through no fault of your own from purchases made at BatteriesDirect while using the secure server.
