A 300w Solar Panel should theoretically be able to run on 100ah. But now comes the matter of how long you'll need to deliver 1120W to the power load. Divide the total watt output by the inverter's wattage requirement.  $1.12 = 1120W / 1000W$  (approx. 1 hour) The power supply should last at least 1.12 hours. However, the inverter power losses, which are around 80%, are not ...
