Technically, all you need to charge a 12v battery is a solar panel with a 12v rating. This can be any solar panel, although the bigger it's, the quicker your battery will charge. Anything under 5-10 watts is not enough, as these will only "trickle charge" your battery very slowly. In general, 12v panels are only available up to a rating of around 200-watts; from there ...
