

What type of power outlet does Fiji use?

Fiji uses Type I power outlets, which have three flat pins in a triangular pattern. US plugs (Type A and B) have two or three flat parallel pins. To use your US devices in Fiji, you'll need a power adapter. It's also worth noting that Fiji operates on 240 V, while the US uses 120 V, so you might need a voltage converter for some appliances.

What type of plug does Fiji use?

The country primarily uses plug type I, which has three rectangular pins arranged in a triangular pattern. This plug type is commonly found in Australia, New Zealand, and some parts of Asia. If you are traveling to Fiji with electronic devices that use a different plug type, you will need to bring a travel adapter.

What type of power socket is used in Fiji?

The power sockets in Fiji are of type I. The standard voltage is 240 V at a frequency of 50 Hz. Check your need for a power plug (travel) adapter in Fiji.

How to pack a travel adapter for a trip to Fiji?

When packing a travel adapter for a trip to Fiji, it is important to remember to bring the adapter with you in your carry-on luggage rather than packing it in your checked baggage. This will allow you to access your electronic devices and charger during the flight.

Can I use my US devices in Fiji?

To use your US devices in Fiji, you'll need a power adapter. It's also worth noting that Fiji operates on 240 V, while the US uses 120 V, so you might need a voltage converter for some appliances. We recommend packing a universal travel adapter to ensure you can charge all your devices hassle-free during your Fijian adventure.
