

## Where are the batteries produced in Uzbekistan

The first-of-its-kind facility in Uzbekistan represents a major leap forward for the nation's energy infrastructure. Spanning roughly 6 hectares, the project will utilize lithium iron phosphate batteries to provide a 150-megawatt power configuration and a 300-megawatt-hour battery energy storage system.

The localization and production of this product is planned to be one of the first in the Khorezm region. Representatives of the association "Uzeltchanoat" paid a working visit to the enterprise LLC "Led Ultra Energy", located in the Koshkopyr district of the Khorezm region, which launches the production of lithium-ion batteries.

Tashkent, Uzbekistan (UzDaily ) --In January-October 2023, large enterprises of Uzbekistan produced 922,200 batteries, the Statistics Agency of Uzbekistan said. Compared to the corresponding period in 2022, production volume increased by 37.2%. In October 2023, 105,500 batteries were produced in Uzbekistan.

Japan may start producing lithium batteries in Uzbekistan Ambassador Mukhsinkhodja Abdurakhmanov met with the Acting Chairman of the Japan-Uzbekistan Economic Cooperation Committee, Advisor to the Itochu Corporation Tsuyoshi Nishitani to discuss the results of the 16th meeting of the bilateral economic cooperation committee, held on October ...
