

# Why is the solar powered home not lighting up

Why are my solar lights not lighting up?

It sounds simple, but it's an easy detail to overlook. Almost every solar light has an on/off switch, typically located at the back. During the day, the solar panel charges the battery, but if the switch is off, the lights won't turn on when night falls. So, if your solar lights aren't lighting up, the first thing to check is this switch.

How to fix solar light not working?

It's a simple trick to clear out any small glitches that might be messing with your light's performance. Here's all you need to do: Turn off the light, count to a few seconds, and then switch it back on. This quick reset often fixes those pesky little issues and gets your solar light running smoothly again. [How to Fix Solar Lights Not Working?](#)

Why are my solar lights not working at night?

During the day, the sensor keeps the solar lights off while the solar panel charges the battery. When night falls, the sensor detects the decrease in light and activates the solar lights. If this sensor is not working correctly, it might not be able to tell when it's dark, and as a result, your solar lights won't turn on at night.

Why is my solar garden light not working?

Most of the outdoor solar garden lights come with ON/OFF button, and that button needs to be turned ON. In many cases this simple thing is ignored by many people and this is one of the main reasons why your solar light isn't working as expected. There might also be a factory defect and the light doesn't turn ON. 2.

Why is my solar-charged light not working?

Another possible reason for your solar-charged light stops working could be the LED bulb is defective or not working. In this scenario, even if your panel, the battery, and the sensors are fine, your light will not operate. The downside here is you have to change your lights unless there is a chance that LED bulbs could be replaced.

What if solar panel is not getting sun light?

If solar panel not getting the required sun light then the LED won't work or can't produce the brightest light as you would have expected. Make sure you place your light at a location where it gets direct sun light.
